EXPERIENCE

I've worked like a salesforce developer about two years. Have experience with Apex, LWC and native Salesforce admin tools. I have many projects related with integration, used Celigo integration app also one of my projects was related with QuickBook integration it required create an API on .NET platform. But I have experience not only with Salesforce tools, if you look at my GitHub profile you can see that I work with different platforms

Sudoku

Easy calculation

90's tennis

GRADUATION AND COURSES

In 2019, I had finished National University of Ivan Franko and got master degree in Applied Statistics. My education was not related with tech, but at university, we often used different kind of software packages as like SPSS, Statistica and programming language named R. Thus I've started getting interested in tech.

After university I've finished basic programming courses and created few websites and several desktop application. There you can see my certificates.

Python

Web UI
